

Using Citrix Workspace via a web browser

This guide from the Center for Microscopy and Image Analysis, University of Zurich, explains how to use Citrix Workspace via web browser.

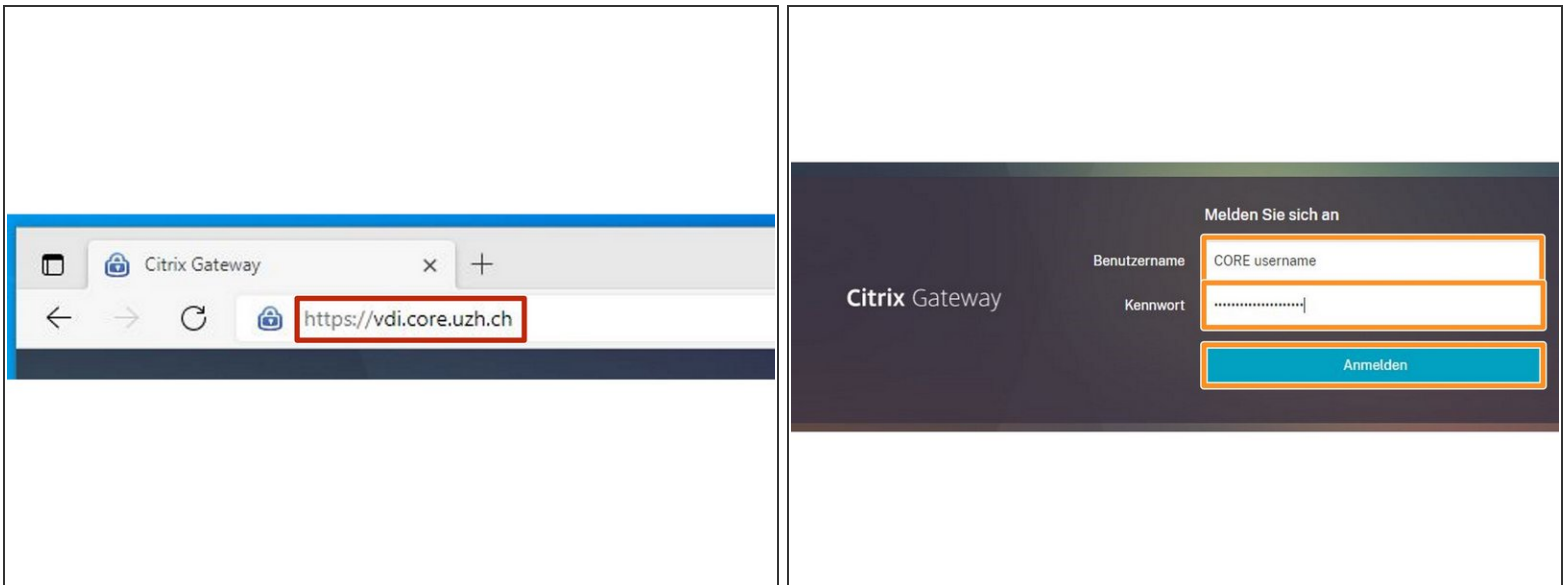

Written By: Jannic Debus

INTRODUCTION

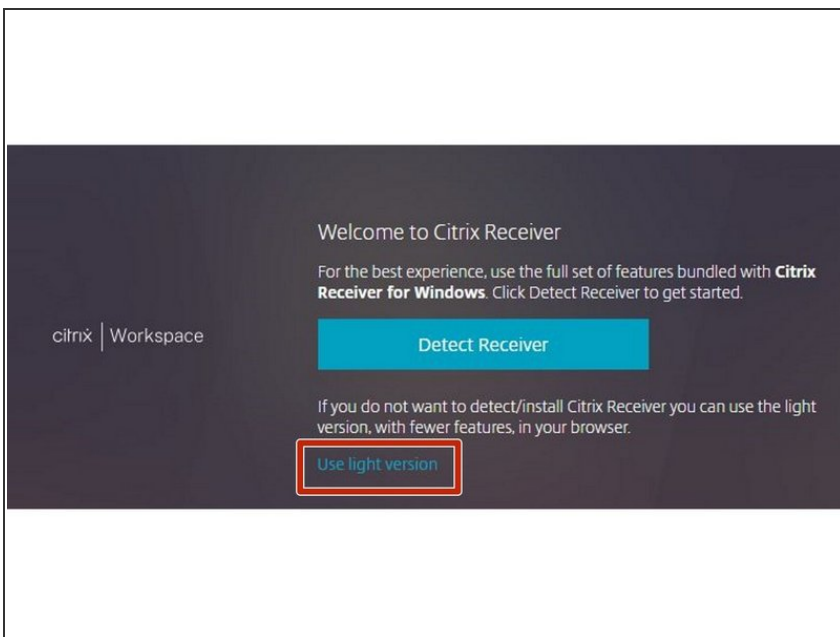

This guide from the Center for Microscopy and Image Analysis, University of Zurich, shows how to access our virtual data processing machines via a web browser. No software installation is required.

Step 1 — Open website

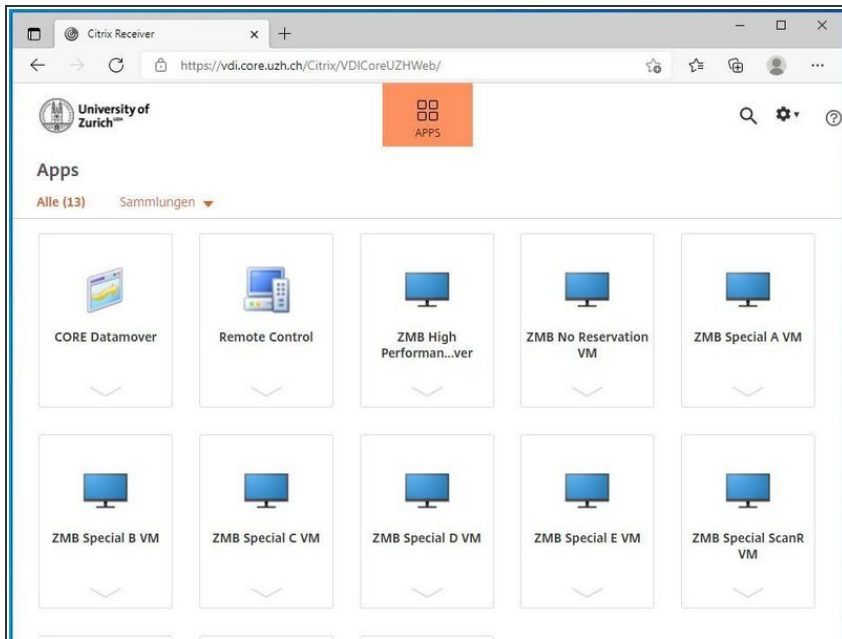

- Open a web browser (officially supported are Firefox, Chrome, Edge and Safari, other browser may still work) on your computer or tablet.
- Insert into the address bar: <https://vdi.core.uzh.ch>
- Use your CORE account to login.

Step 2 — Start virtual machines

- Select "Light Version".

Step 3

- That's it, you have successfully configured Citrix Workspace via web browser.
